## **The 2018 Senior Calculus Seminar**

Often, first year students in college find their calculus courses exceptionally difficult. Sometimes, the quality of the teaching leaves much to be desired; other times, they are in class with highly motivated and competitive students who have focused on advanced math studies in high school at the expense of other liberal arts learning experiences. These factors coupled with the new, very abstract concepts of calculus and the need for demanding computational skills can make a calculus course very intimidating for many students. This seminar seeks to give various survival skills for Kellenberg students during their first year collegiate calculus courses.
